Ministerial Research Award — 3rd Prize, Oct 2017

8+ YEARS EXP.	**4** COMPANIES
945 TOEIC SCORE	**5** CERTIFICATIONS

Finance and Accounting professional with **8+ years of experience** across **Big 4 audit (Deloitte)**, IFRS reporting, cost & pricing accounting at Vinamilk, and multi-role finance management. Known for the ability to **read, deep-dive, and extract meaningful insight from complex financial data** — whether variance reports, loan portfolios, or cost structures — and translate findings into clear, actionable narratives for diverse stakeholders from business owners to C-suite and regulators. Combines strong **interpersonal and data-collection skills** to work across functions, refine raw information, and surface what matters most. Currently **bridging deep finance domain expertise with data science capabilities** — applying Python, statistical analysis, and ML fundamentals (Google Advanced Data Analytics) to real-world financial datasets, with an active portfolio in development connecting hands-on work experience to data-driven models and insights.

PROFESSIONAL EXPERIENCE

Pricing & Costing Specialist

Feb 2025 - Apr 2026

Vinamilk · Ho Chi Minh City

- Calculate and close product manufacturing costs monthly using **Oracle E-Business Suite (EBS)**; ensure accuracy, timeliness, and VAS compliance.
- Analyse raw material consumption variances vs. standard batch norms; investigate root causes and prepare variance analysis reports for management review.
- Leverage **Oracle DB and Oracle BI** for operational reporting, data extraction, and management dashboards alongside Oracle EBS.
- Reconcile inventory ledgers (subsidiary vs. GL); prepare monthly inventory movement reports; control operating costs and manage associated contracts.
- Developed a personal monthly **sales channel prediction workflow** — built a simple linear regression model in Excel using 5 years of historical sales data with average price as the key input variable (tested GDP and interest rate as additional variables; excluded after R-squared indicated low correlation); cross-checked results against Power BI's built-in time-series forecast as a secondary reference.
- To perform cost & pricing analysis accurately, proactively engaged with multiple internal stakeholders on a monthly and ad hoc basis to gather current sales channel data — synthesised with P&L-level expense analysis and used to facilitate grounded discussions with the sales department; applied personal judgment to work with real, present information rather than relying solely on static objectives, which was the prevailing departmental practice.
- Used **AI tools (Microsoft Copilot)** to assist with Power BI M-code and Power Query development, accelerating report-building workflows.
- Liaise with external auditors, tax authorities, Department of Industry & Trade, and Statistics Office as required.

Finance Officer

Oct 2022 - Jan 2025

SME IT Outsourcing Company · Ho Chi Minh City

- Delivered monthly financial reports with KPI metrics; prepared annual budgets and monitored expense control.
- Conducted comprehensive economic contract reviews to identify potential financial risks and opportunities.
- Designed and maintained **Power BI** dashboards to track budget vs. actuals, expense trends, and financial performance for senior management.
- Led cross-functional project for the company's business model transition.
- **Concurrently** served as Finance & Accounting advisor for a private limited company (10-person team) — progressing from revenue control, invoicing, and expense verification to full cash flow management, expense control oversight, and periodic tax review; built Power BI reports (~15% of engagement) covering cash flow projections, timeline tracking, and revenue dashboards for the business owner.

Finance Executive — IFRS Reporting

Nov 2021 - Oct 2022

Home Credit Vietnam Co. Ltd · Ho Chi Minh City

- Owned daily, monthly, quarterly, and year-end IFRS financial reporting for European parent consolidation; utilised **SAP FICO** for IFRS financial accounting and IFRS 16 lease liability calculations.
- Consulted and supported the implementation of IFRS into daily business operations, guiding cross-functional teams on accounting treatments and compliance requirements.

- Worked extensively with a **30M-row enterprise Oracle data warehouse** (fed daily from European parent) — authored and extended production-grade Oracle SQL covering multi-step ETL pipelines (`INSERT`, `MERGE`, staged commits), CTEs, window functions (`ROW_NUMBER OVER PARTITION`), and `PIVOT/UNPIVOT` for multi-month trend reshaping; contributed ~30% new logic covering **IFRS 9 stage reclassification** (Stage 1/2/3 based on DPD thresholds and deterioration flags) and **Covid-flag portfolio adjustments**.
- Built **month-on-month provision variance analysis** across 8 product segments (CD, TW, CLX, REL, RM etc.) using full outer join CTEs to classify movements as Recovery, Additional Write-Off, or New Write-Down — directly supporting P&L reporting for Vietnamese C-suite and European parent company.
- Produced aggregated datasets and sub-tables for Finance team operational use; delivered outputs via Excel-based reporting to C-suite and regulators.
- Reported performance against **EBA guidelines** and Vietnamese State Bank requirements on ad hoc basis.
- Led finance workstreams for new subsidiary setup, first corporate bond issuance, and new credit product launch.

Senior Auditor

`May 2017 - Nov 2020`

Deloitte Vietnam Co. Ltd · Ho Chi Minh City

- Led audit and due diligence engagements across diverse industries; performed in-depth financial analysis and documentation supporting client goal-setting, investment decisions, and risk assessment.
- Managed audit engagement teams of 3–6 members; conducted fieldwork across **SAP FICO**, Oracle DB, Misa, and Fast ERP systems.
- Dedicated ~40% of the final 1.5 years to **IFRS and US GAAP client engagements** — reviewing financial statements, advising on standard alignment, and supporting reporting teams across multinational clients.
- Built **Power BI** dashboards to visualise audit findings, client financial trends, and engagement KPIs for senior management review.
- 🏆 **Green Dot Award for Special Contribution** (Dec 2018) — firm-wide recognition for exceptional performance.

AWARDS
